 marcel.lamarca@oracle.com

About My Career

- 22 Years dedicated to study and support Oracle Databases.
- 12 Years working with Exadata (On-prem, C@C and Cloud Services) .
- 5 Year working for Oracle do Brasil
- 2 Year on Alliances LAD knowledge Team

Certifications

Oracle Cloud Specialist (OCS)

- Exadata Database Machine X9M Certified Specialist
- OCI Foundation 2020 / 2023
- Oracle Autonomous Database Administrator Professional 2019 / 2023
- Oracle Cloud Database Migration and Integration 2021
- OCI Cloud Certified Architect Associate 2022
- OCI Cloud Certified Architect Professional 2022
- OCI Multi-Cloud Architect Professional 2023
- Oracle Database Services Certified Professional 2023

Oracle Certified Professional (OCP)

- Oracle Database certified professional 10g, 11g, 12c and 19c.
- Mysql 8.0 Database Administrator Certified Professional

Oracle Certified Specialist (OCE)

- Grid/RAC Database Administrator 11g
- Oracle Golden Gate 12c Certified Implementation Specialist

OCI Budget

- Track actual and forecasted spending for the entire tenancy or per compartment
- Set alerts on your budgets at predefined thresholds to get notified
- View all of your budgets and spending from one dashboard

ORACLE Cloud

us-ashburn-1

Budgets

You can use budgets to track costs in your tenancy. After creating a budget for a compartment, you can set up alerts that will notify you if a budget is forecast to be exceeded or if spending surpasses a certain amount.

Message from your administrator

You are getting this alert because you are forecasted to overspend your budget this month. Please take action to reduce your spending. If your increase in spending is required and you cannot find ways to save money, refer to internal guidelines at <http://myintranetsite.com/accounting/budgets>.

Sample Dashboard from an usage report

Service Limits and usage

- When you sign up for Oracle Cloud Infrastructure, a set of service limits are configured for your tenancy.
- The service limit is the quota or allowance set on a resource
- You can view your tenancy's limits, quotas, and usage in the Console.
- You can check Limits and Quotas before a deployment
- You can submit a request to increase your service limits from within the Console.

ORACLE Cloud

us-ashburn-1

Limits, Quotas and Usage

Your tenancy comes with a predefined set of [service limits](#) on the maximum number of resources you're allowed to use. You can [request a service limit increase](#). If you're an administrator, you can also set your own [quotas](#) for any compartments you manage.

Compartment Quotas

- Quotas give you better control over how resources are consumed by letting you allocate resources to projects or departments
- Allocate high-value and expensive resources only to specific compartments
- Restrict a compartment's usage to a small set of resources, restrict resource counts or disable services as necessary
- Similar to Service Limits; but service limits are set by Oracle, and compartment quotas are set by administrators

The screenshot displays the Oracle Cloud console interface. At the top, the navigation bar shows 'ORACLE Cloud' and the user 'us-ashburn-1'. The breadcrumb trail indicates the path: 'Governance > Quotas > Quota Details'. The main content area features a large green circle with a white 'Q' representing the quota. To the right of the circle are buttons for 'Edit', 'Delete', and 'Add Tags'. Below these is a tabbed interface with 'Quota Information' selected. The 'Quota Information' section includes a 'Description' (Allocates all exadata to a compartment), an 'OCID' (...pkckg7mbca) with 'Show' and 'Copy' links, and a 'Created' timestamp (Mon, 01 Jul 2019 14:36:11 GMT). On the left side, under the 'Resources' heading, the 'Statements (2)' tab is active. The 'Statements' section contains a table with two entries: 'Zero database quota /exadata/ in tenancy' and 'Unset database quota /exadata/ in compartment ProductionApp'. A 'Showing 2 Items' indicator is at the bottom right of the statements table. The footer contains links for 'Terms of Use and Privacy' and 'Cookie Preferences', and a copyright notice for 2019.

Oracle License Manager on OCI Console

License Manager

License Manager is a free, opt-in service that makes it easier for you to Bring Your Own License (BYOL) on OCI with the following capabilities:

- Automating the license portability rules for Oracle Database products to OCI Database service
- Single pane of glass to track licensing needs on both IaaS and PaaS resources. Use the same tool to track Oracle and Third-party license utilization
- Pro-active email notification on over-subscription and license expiration scenarios.

License Manager e-mail notification

Dear Customer,

Re: License Manager Summary.

The following is a summary of License Manager items that require your attention for licensemanagerdemo as of date 05/09/2022.

Sincerely,
License Manager

Oracle Cloud Advisor

Advisor is a recommendation engine that will guide you to implement best practices and optimize spending in OCI

- Continuously evaluates your resources, searching for improvement opportunities
- Provides cost management, performance, high availability, and security recommendations.
- Provides guidance for how to act on recommendation. When you're ready to downsize specific compute instances, Cloud Advisor provides a UI workflow for doing so

Cost Management Best Practices

- **Create a budget that matches your commitment amount and an alert at 100 percent of the forecast.**
- **Gives you an early warning if your spending increases and you're at risk of getting an overage.**
- **Use compartments for cost management along with access-control. Many customers set up one compartment per department for cost management and cross-charging.**
- **Use cost-tracking tags (like cost-center) to allocate cost in more granular ways.**
- **Enable monitoring on all resources. You can merge monitoring data with cost data to gain powerful insights on how to improve resource utilization.**
- **Use the usage report to analyze costs and drive custom solutions.**

Summary of OCI Cost Management and Governance Services

Governance

A variety of cloud platform tools can help you manage your footprint on OCI more efficiently. Organizations, Compartments, Tagging will keep you in control.

Cost Optimization

Ensure that you're making the most of your cloud resources and rely on OCI to automatically identify and eliminate inefficiencies.

Cost Reporting

Visualize consumption information, dive deeper into resource-level granular reports, and create accountability against targets for your IaaS/PaaS or SaaS..

Cost Controls

OCI helps you track your budgets so that your cloud costs don't spiral out of control. With build-in extensibility, budgets can be integrated into the systems you already use to drive automated response.
